

Professional Services

Work Zone Cam delivers a professional, reliable, and responsive construction camera service at budget prices to document and promote your projects.

OUR APPROACH

The approach is simple – offer the best construction camera for the lowest price.

The services we provide are clear and to the point. You only pay a low monthly fee for the days you actually use the camera to transmit images.

We are driven by our commitment to satisfy customers by delivering outstanding support and value. With Work Zone Cam, there truly are no hidden fees or gimmicks. Avoid the effort, frustration, and disappointment usually associated with low quality (3 and 4 megapixel) webcam solutions.

Remember - Work Zone Cam brings you high quality, doesn't require contracts, and comes with a lifetime warranty.

Additional benefits include:

- Free cellular service available nationwide
- Free custom designed public web page
- Unlimited hosting and social media sharing
- Free up-to-date time-lapse movie available online anytime
- Purchase and lease pricing available
- Free shipping and handling of the camera system

WIRELESS SERVICE INCLUDED

Work Zone Cam delivers the fastest 3G wireless cellular services available. With Work Zone Cam, you have more options due to our extensive coverage area. Our cellular service is included free of charge and there are no contracts and no additional fees.

Network Connection Ready

Work Zone Cam does not force you to be dependent on utilizing the included wireless service. If you already have a high-speed network connection, no problem. Every Work Zone Cam construction camera system is equipped with an Ethernet port (RJ-45 network jack) and we will configure your state of the art camera system to work with your existing connection.

Whether you choose wireless or hardwired, we have you covered.

ONLINE TECH SUPPORT

Our team is made up of experienced industry experts. Online support is available 24/7 and our knowledgeable technicians are also standing by to discuss your installation and technical questions.

Backed by the best support team and technology in the industry, Work Zone Cam is dedicated to successfully delivering a reliable camera for your project and guaranteeing your satisfaction.

In addition, Work Zone Cam offers extended office hours, including Saturdays, to provide enhanced customer service and emergency shipping services.

ARCHIVING SERVICES

Enjoy reliable, fast access to your construction site images anytime - online or on your mobile device.

Your content is valuable - don't entrust it to services that rely on 3rd party rented servers in an unknown data center. At Work Zone Cam, we securely store your vital images on servers that we own and manage. We are completely responsible and aim to protect your important data.

Work Zone Cam offers a hosted, managed solution that is monitored 24x7x365 with fully redundant, onsite storage of image content for maximum reliability and accuracy. Every 30 minutes, a 6.3 megapixel image is securely uploaded to our storage array and time stamped for accuracy. Camera systems are monitored around the clock and automated quality control checks scan your data to ensure that your image content is being captured consistently and at the proper resolutions.

No Software - Pure & Simple

Work Zone Cam delivers your construction site images directly to your website. There is no client-side software to install and no systems for you to maintain on your site. Easily access and navigate your image content with the intuitive calendar controls included with your free web interface.

CAMERA WEB INTERFACE

Work Zone Cam's professional web interface makes it easy for you to instantly promote your project online and offers an excellent opportunity to impress potential customers. Viewing the project live encourages your clients and other visitors to return to your website repeatedly to observe the progress.

Choose from a variety of customizable designs with features that include a digital pan, tilt, zoom controller, up-to-date project time-lapse movie, multi-function interactive calendar, weather conditions, Google location map, and more.

Work Zone Cam provides you with virtually everything you need to link to your custom public/private page or embed the interface in your website.

TIME-LAPSE MOVIE SERVICES

Your Work Zone Cam system produces an up-to-date time-lapse movie on demand for you to instantly promote your project. Share a link to the time-lapse via email, instant message, or on social networking sites. Enhance your own site by embedding the time-lapse video for unlimited users to enjoy.

Professional Time-Lapse Editing

Time-lapse movies are today's premiere approach for documenting and promoting construction projects. Rely on Work Zone Cam's team of experienced producers who utilize the latest technology to improve and enhance your video.

Turn thousands of images captured during the life cycle of your project into an HD quality time-lapse movie for your lobby display, conference room, or website. There is nothing more powerful than seeing years of hard work come to life in seconds.

MOBILE SUPPORT

Work Zone Cam supports mobile devices, including the iPhone, Android, iPad and Xoom tablet, for you to view your camera at virtually anytime.
