

## Daytime Lane Restrictions through Thursday

29 June 2015 Keith Todd

KENTUCKY (6/29/15) — The US 68/ Kentucky 80 Eggners Ferry Bridge will be restricted to one lane starting at approximately 8 a.m., CDT, each day, to facilitate the pouring of concrete for construction of the new bridge.

This lane restriction is expected to be in place for about 12 hours each day.

Due to the ramping up of work along the bridge project, motorists should be prepared to encounter lane restrictions on the existing bridge almost daily for the next month. However, hours may change somewhat due to weather conditions, temperatures and work requirements.

Concrete trucks are required to park on one lane of the old bridge to deliver concrete to the work site for the new structure.

Motorists should be alert for one lane traffic with alternating flow controlled by flaggers. Delays are possible.

Due to the number of trucks delivering materials to the construction site for the new bridge around the clock, motorists should continue to use caution in this busy work zone.

Motorists should continue to be alert for oversized loads of steel heading to this construction site along US 641 and Kentucky 80 through Marshall and Calloway Counties and from I-24 along Kentucky 453 and The Trace through Land Between The Lakes.

Johnson Brothers Construction is the prime contractor on the \$133 million New Eggners Ferry Bridge. To observe construction activity on the new bridge go to <http://www.workzonecam.com/projects/kytc/131212>.
